Compression Algorithm Design: Singular Value Descomposition

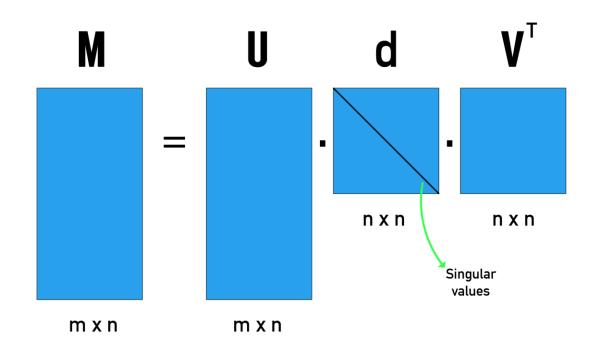

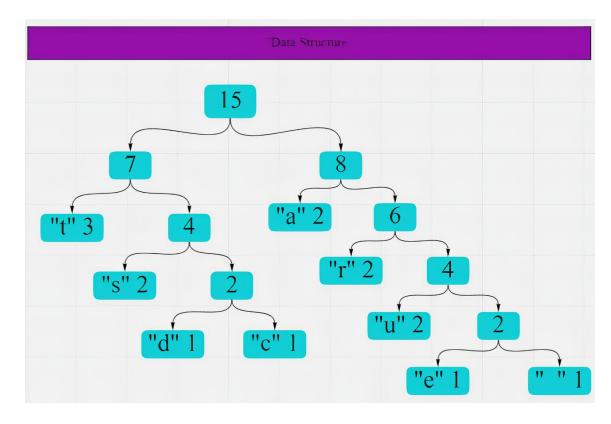

Photo by Wolfgang Hasselmann on Unsplash

Compression Algorithm Design: Huffman Coding

The binary tree is a data structure which is composed of root, branch and leaf, in which each node can have one left and one right child.

Compression Algorithm Design: Huffman Coding

Huffman Tree from the string "Data Structure"

Character	d	а	t	S	f
Frequency	1	2	3	2	2

Character	u	С	е	11 11	Total
Frequency	2	1	1	1	15

Photo by Doruk Yemenici on Unsplash

Huffman coding is implemented by constructing a binary tree of nodes from a list of nodes, whose size depends on the number of symbols n. The nodes contain two fields, the symbol and the weight.

Compression Algorithm Complexity

SVD	Time Complexity
Image compression	O(N)
Image decompression	O(N)

Time complexity of the SVD algorithm. N is the width of the matrix and M represents the length of the image matrix.

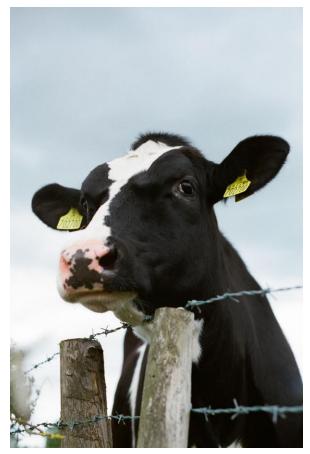

Photo by Jakob Cotton on Unsplash

Compression Algorithm Complexity

Huffman	Time Complexity	Time	
Image compression	O(N*M)	0.7333s	
Image decompression	O(N)	0.574s	

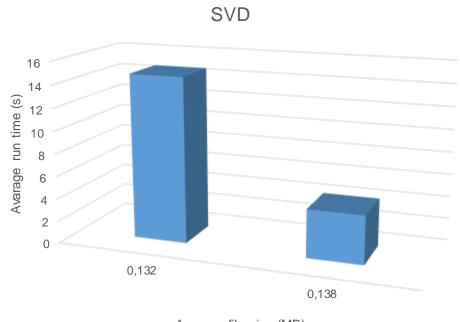

Time complexity of the Huffman algorithm. N is the width of the matrix and M represents the length of the image matrix.

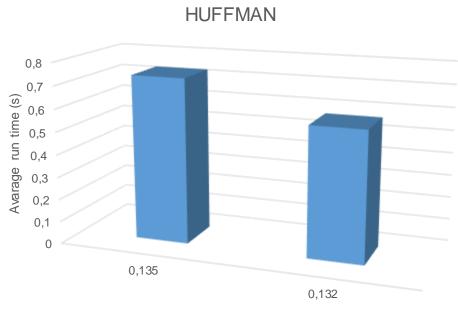

Time Consumption

Average file size (MB)

Average file size (MB)

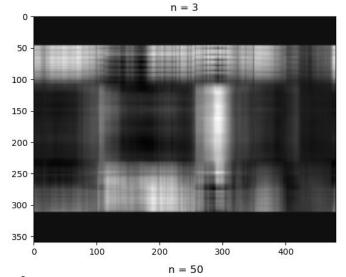

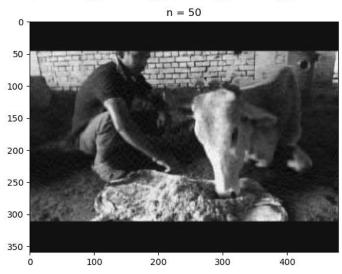

Average Compression Ratio

	Compression Ratio
Healthy Cattle	2:1
Sick Cattle	2:1

Here we represent the rounded Average Compression Ratio of all the images of Healthy Cattle and Sick Cattle that were took into account in the project.

Thanks!

Supported by

These acknowledgments are for being scholarship holders of Sapiencia and generacion E, because of that we are thankful to these two funds and so we were able to develop this project. Your help and contribution to our education is so important it give us the possibilities to study. All authors would like to thank the teacher Mauricio Toro and his monitor Simón Marin, also the Vicerrectoría de Descubrimiento y Creación, Universidad EAFIT, for their support in this research and development. This work is what it is today thanks to perseverance and constant interest.
